

125792-1

## CLAIMS:

1-6. (WITHDRAWN)

7. (Amended) An antistatic or antidust composition comprising a melt blend of:

an aromatic sulfonate compound and a thermoplastic polymer, wherein the aromatic sulfonate compound is represented by the formula:

wherein each  $R^1$  independently comprises aliphatic or aromatic, substituted or unsubstituted, carbocyclic or heterocyclic radicals, each X is selected from the group consisting of phosphorus and nitrogen; wherein "a" is 0, 1 or 2, and "b" is 0, 1 or 2 with the proviso that (a + b) is an integer greater than or equal to 1;  $G^1$  is an aromatic group; E comprises a bis(carboxyloxyalkyl) polydiorganosiloxane, a bis(carboxyloxyaryl) polydiorganosiloxane, and an ether linkage; each  $Y^1$  independently comprises hydrogen, a monovalent hydrocarbon group, alkenyl, allyl, halogen, bromine, chlorine, nitro; and OR, wherein R is a monovalent hydrocarbon group; "q" represents any integer from and including zero through the number of positions on  $G^1$  available for substitution; "t" represents an integer equal to at least one; "s" represents an integer equal to either zero or one; and "u" represents any integer including zero; with the proviso that when E is an ether linkage, then X is phosphorus.

8. (Original) The composition of Claim 7, wherein said aromatic sulfonate compound is about  $2.5 \times 10^{-3}$  parts to about 6 parts per 100 parts of the thermoplastic polymer.

9. (Original) The composition of Claim 7, wherein said thermoplastic polymer comprises a polycarbonate, polycarbonate, polyphenylene sulfide, polyetherimide, polyester, polyphenylene ether, polyphenylene ether/styrene polymer blends, polyamide, polyketone, acrylonitrile-butadiene-styrene copolymer, styrene-acrylonitrile copolymer, polyolefin, blends thereof, and blends thereof with other materials.

125792-1

10. (Original) The composition of Claim 7, wherein the aromatic sulfonate compound is selected from the group of formulas consisting of:

wherein "a" has a value of about zero or one,  $R^2$  can occupy an ortho or a para position on the aromatic ring, and is independently selected from the group consisting of  $C_6$  to  $C_{20}$  linear and branched alkyl radicals; and

wherein "n\*" has a value of about 7, and mixtures thereof.

11. (Original) A molded or blown article comprising the composition of Claim 7.

12. (Original) A coating composition comprising the composition of Claim 7.

13. (Original) A film comprising the composition of Claim 7.

14. (Original) A fiber comprising the composition of Claim 7.

15. (Original) A fabric comprising the fiber of Claim 14.

16-47. (WITHDRAWN)
